

<b>Course title:</b>	<b>Number Theory</b>
<b>Department:</b>	Department of Mathematics, Faculty of Computer Science and Telecommunications
<b>Course code:</b>	F2-NTh
<b>Erasmus subject code:</b>	11.1 Mathematics
<b>Number of contact hours:</b>	45 hours
<b>Course duration:</b>	1 semester
<b>ECTS credits:</b>	6

**Course description:**

This course is an elementary introduction to number theory for undergraduate students in Mathematics, Computer Science, Physics or Engineering with no previous knowledge of the subject.

Topics covered include: common number sets, the principle of mathematical induction, minimum principle, primes, division algorithm, the Euclidean algorithm and continued fractions, greatest common divisors, the m-adic representations of integers, the binomial coefficient, the lexicographic order, examples of abelian groups, congruence's, the ring of congruence classes, Fundamental theorem of arithmetic, the p-adic value, the radical, Sieve of Eratosthenes, Bertrand's postulate, diophantine equations, the Euler Phi function, The Chinese remainder theorem, Wilson theorem, Euler's theorem and Fermat's Little theorem, pseudoprimes and Carmichael numbers, reduced residue system, primitive roots, the index with respect to primitive root, the discrete logarithm, power residues, quadratic reciprocity.

**Literature:**

<b>Course type:</b>	lectures (30 hours), problem sessions (15 hours)
<b>Assessment method:</b>	two tests during the semester, final exam
<b>Prerequisites:</b>	at least one college level math course
<b>Primary target group:</b>	Majors in Computer Science, Mathematics, Physics or Engineering
<b>Lecturer:</b>	Maciej Zakarczemny, PhD
<b>Contact person:</b>	Maciej Zakarczemny, e-mail: mzakarczemny@pk.edu.pl
<b>Deadline for application:</b>	15th of September
<b>Remarks:</b>
