

| Course title                       | Evolutionary Computing   |
|------------------------------------|--|
| Institute/Division                 | Faculty of Computer Science and Telecommunication/ Department of Computer Science  |
| Course code                        | F-1. EC  |
| Erasmus subject code               | 11.3, 11.4   |
| Number of contact hours**          | 45 lecture hours (45h)   |
| Course duration                    | 1 semester (Spring/Fall)   |
| ECTS credits                       | 6  |
| Course description (max 100 words) | <ul> <li>1- Introduction to Evolutionary Computation</li> <li>2- Genetic Algorithms</li> <li>3- Evolution Strategies</li> <li>4- Genetic Programming</li> <li>5- Learning Classifier Systems</li> <li>6- Tuning Evolutionary Algorithms</li> <li>7- Neuro-evolution</li> </ul> |
| Literature                         | A.E. Eiben and J.E. Smith, Introduction to Evolutionary<br>Computing, Second Edition, Springer, 2015, ISBN 978-3-662-<br>44873-1   |
| Course type/organization           | Lectures, Computer labs, Projects  |
| Assessment method                  | Laboratories, assignments, project, seminar, exam  |
| Prerequisites                      | Introduction to Algorithms   |
| Primary target group               | Computer science students in the 3rd or 4th year   |
| Contact person                     | dr inż. Mariam Zomorodi, prof. PK  |
| Course application deadline        |  |
| Remarks                            | N/A  |

\*please insert one of the following codes:

- 11.0 Mathematics, Informatics
- 11.1 Mathematics
- 11.2 Statistics
- 11.3 Informatics, Computer Science 11.4 Artificial Intelligence
- 11.5 Actuarial Science
- 11.9 Others Mathematics, Informatics

<sup>\*\*1</sup> lecture hour=45 minutes
